
INTRODUCING GLACIER

- We created our cryptocurrency on 2021-06-07. Our goal is to create a currency that people can easily use for transactions.
- Numerous people believe that cryptocurrencies will become the currency of the future. We also believe in it, that is why GLC was born which serves two main functions.
- One of its functions is to be able to buy products in our webshop using own payment gateway and later at our partners. We are currently working to achieve this. Our webshop will soon be available to anyone where you can spend your GLC tokens for different products. In the near future one of our goals is building up a software system around GLC.
- Crypto investors to earn attractive APY on their Digital Assets while also farming GLC. Our commitment to the Binance ecosystem and native implementation on Binance Smart Chain (BSC) offer users the speed and dependability that is currently lacking on the Ethereum blockchain

Released 2021-06-07 on the Binance Smart Chain network, the Glacier project has been iteratively built and improved upon by volunteers within the community since its inception. Graphic designers, writers, web developers, influencers, marketers, data analysts, translators, and more have contributed their talents to help Glacier grow into an inspirational model of community-driven success. The project has become a unique social experiment in which the investors are integrated into the project both from a community and developmental standpoint. With so much progress achieved by its community in such a short amount of time, Glacier stands as a solid milestone in this progressive, exciting age of the Social Blockchain.

Transparency

Transparency is a top priority for the Glacier team and community. New volunteers are constantly joining the team and making contributions. How your talents, interests, or profession are suited to contribute You are invited to join the community and grow and publicize the project. Each step of the project will be decided by the vote of the whole community. is given. Stock market listings, advertising deals from day one and with the votes of the whole community on every step, including the choice of shelter for donation decision is made. One of the rare projects where the investor has a say For Glc, the GLC team will be responsible for the project's Governance in the future. planned to evolve into the system

Community Wallet

Developer - a community project with no team wallet and funding On behalf of Glacier, there is a fundraising event where investors can donate for the development of the project. community wallet will open

ROADMAP

Q2 2021
